Summary

My objective is to develop innovative games / tools and obtain a full time job on game / web development.

I've developed various tools to help and motivate the development team, such as:

- **Kromit** (collect cards by making small pull requests on GitHub) – <https://kromit.me>
- **Jenkins deployment tool** (easy Jenkins deployment) - <https://github.com/edunad/testing-chamber>
- **Quick-attach** for visual studio (one click process attach) - <https://github.com/edunad/quickAttach>
- **Find-trash-files** to locate duplicate files on the solution - <https://github.com/edunad/find-trash-files>

Experience

1 Year & 6 Months Software Developer at Philips (Northern Ireland – September 11 2016 to current date)

Front / Back-end Web Developer (ASP.Net, JavaScript, Typescript) – Same as bellow

1 Year Internship at PathXL (now part of Philips) (Northern Ireland – July 19 2015 to July 19 2016)

Front / Back-end Web Developer (ASP.Net, JavaScript, Typescript)

- Created various web tools to help pathologists study human tissue for tumor research.

Application Developer (C++)
